PERSONAL PROFILE: *I am a Software Developer with 6 years of experience in web platforms and currently working for Turkish Airlines Technology in Izmir as a backend Java developer. My main aim is to build robust, stable, flexible, extensible, high-quality software with teams having highly-competent, motivated people in a fast and efficient way. I'm currently interested in software architecture.*

PROFESSIONAL EXPERIENCE

- 04.22- **Turkish Airlines Technology** **Izmir, Turkey**
Integration Engineering
Senior Software Developer
- Overall Responsibility:
Developing, maintaining and integrating microservices.
 - Project Details:
More than 10 projects, all of them about integration between model outputs and systems. Some of them require high availability and performance (i.e. under 20ms response time). On the other hand, some of them require daily scheduled bulk operations. I am responsible for building the architecture of these systems.

More than 5 projects, all of them working as customer data provider for companies. These systems handle large-sized data and provide requested information.
 - Technologies:
Java, Spring, Python, MongoDB, Oracle, Teradata, Couchbase, Jenkins, Docker, Openshift, Kafka, Redis, Weblogic, Oracle Service Bus
- 11.19-03.22 **Turkcell via Ericsson** **Remote**
Consultancy
Software Developer – Senior Software Developer
- Overall Responsibility:
Developing and maintaining microservices.
 - Project Details:
BiP - It is a communication and life platform where users can make free VOIP calls and messaging as well as find many services they need in their daily lives, from magazines to sports and weather and so on. "Discover" is a part of BiP Messenger that I've worked for. Discover includes different services for daily life.

DSS-CRM – DSS(Digital Services and Solutions) products need their own CRM(Customer Relationship Management) software. The project is developed for call center specialists. System capabilities are customer, subscription, consent management, admin panel etc.
 - Technologies:
Java, Spring, PostgreSQL, MongoDB, Oracle, Grafana, Jenkins, Docker, Openshift, Kafka, Redis, Angular

09.17-10.19 **Logo Business Solutions** **Izmir, Turkey**
Business Solutions
Software Developer

- Overall Responsibility:
Developing Java Based PaaS Projects
- Project Details:
People - Firstly, a microservice architecture PaaS project is developed and then “People” is developed for human resources employees. System capabilities are payroll, employee management, organization management, payment management, time and attendance management, employee health management etc.

Cockpit - To improve communication between interviewee, employee, manager and human resources department. Cockpit is the web part of a mobile application.

- Technologies:
Java, Groovy, Vaadin, Spring, Hibernate, Docker, AWS, PostgreSQL, MongoDB, Redis, AspectJ

07.17-09.17 **Turkcell via Accenture** **Izmir, Turkey**
Consultancy
Software Developer

- Overall Responsibility:
Preparing Documentation and Development of IDM/IAM System
- Project Details:
Turkcell, one of the largest communication providers of Turkey, has an identity and access management system. Some of the enhancements were developed and documented.
- Technologies:
RSA, Oracle, PL-SQL, Java
